EDUCATION

Institute of Engineering and Technology DAVV, Indore
Bachelor of Engineering in Computer Science

Nov 2020 - May 2024

Carmel Convent Senior Secondary School
Major Physics, Chemistry, Mathematics

June 2018 - April 2020

TECHNICAL SKILLS

Programming Languages: C/C++, Javascript

Front-End Technologies: React.Js, HTML5, CSS3

Databases: MySql

Soft Skills: Data Structures and Algorithms

PROJECTS

Folapo - [Github](#) | [Live Project](#)

- Folapo is an online food delivery site built using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented user authentication functionality with login and signup features to ensure secure access for users.
- Designed and developed the cart functionality, allowing users to add food items to their cart.
- Implemented the "My Orders" page to display the order history of users, enabling them to track their previous orders.

Starbucks - [Github](#) | [Live Project](#)

- A Starbucks clone is a web application that mimics the look and feel of the popular coffee chain's online platform.
- It is built using React JS, a JavaScript library for building user interfaces, and Tailwind CSS, a utility-first CSS framework.
- Implemented the frontend components, including the landing page, menu items, and user interface elements, to closely mimic the design and functionality of the original Starbucks website.

EXTRA-CURRICULAR ACTIVITIES

- Participated in Hactoberfest 2022.
- Designing Portfolio
